Notice: It is an offence under section 72 (1)(f) of the BC Safety Standards Act to knowingly provide false information on this form.

Notes:

1. For plant classification, see PEBPVR Safety Regulation, part 1, Div. III. (E.g. Refrigeration, 1st, 2nd, 3rd, 4th, 5th).
2. A **Power Engineer Trainee** is a person who has assisted in the operation of a plant but does not hold a certificate of qualification. (6 months for 4th class & Refrigeration Operator, 4 months for 5th class boiler. 1 month's experience for Ice Facility Operator).
3. **Acceptable Experience** (only applicable to 4th or 5th class power engineer's certification) includes work experience gained in the operation, design, construction, repair or maintenance of equipment to which the PEBPVR Safety Regulations may apply. Acceptable work experience must be supported by a separate testimonial, such as a resume, clearly outlining the pressure equipment involved and the corresponding duties and responsibilities. The testimonial must be duly signed by the Chief Engineer or an authorized company official.
